

Environmental Sustainability in Health Technology Assessment

TIMETABLE

- 10.00** Introductions
Environmental life cycle assessment (eLCA)
- 10.05**
- Phases in an ISO LCA Study
 - Inventory analysis and life cycle impact assessment
 - Interpretation of the LCA
- Product standard greenhouse gas (GHG) inventory
- 11.05**
- Phases in a Product Standard GHG inventory
 - Data collection and quality assessment
 - Sensitivity and uncertainty analysis
- 12.05** Lunch Break
- Environmental outcomes and economic evaluation
- 12.35**
- Spending on new healthcare and opportunity cost
 - Maximising quality-adjusted life years
 - Combining multiple outcomes for decision making
- 13.35** Coffee Break
- 13.45** Breakout Session
- 14.05** Group Feedback
- 14.45** Wrap up discussion and Q&A
